* DIG: A History of Black Achievement in America

This is a digital resource series. This original, eight-part series documents Black Achievement in American history, its defining role in the growth of a country, and influence on current events. Presented by James Avery, the series highlights the many contributions of Black Americans that have influenced our culture, enriched our society with their achievements, and shaped the history of the United States. It's one of the least known stories in American history. It is the story of black achievement and accomplishment. Against all odds, American blacks have built their own institutions: families, schools, churches and businesses. Against all odds, American blacks have created great art and science.... Fought heroically in every American war. Against all odds, black men and women have worked endlessly to secure their own freedom and equality. The untold Story of blacks in America is a 350-year saga of incredible achievements. This is that story. (05-06 ambrose abc)
